ENJOY THE FREEDOM OF COMPLETE MOBILITY.

DataCollection enables you and your employees to execute daily inventory transactions with complete mobility by utilizing an iOS or Windows Mobile device.

PRINT WHAT YOU NEED, WHEN YOU NEED IT.

Create customized labels, receiving paperwork, and a bulk pick ticket in minutes, then order a print from your device. No more running back and forth from your desk.

RECEIVE PURCHASE ORDERS IMMEDIATELY.

Receiving against a purchase order is the fastest and most precise way of receiving merchandise. DataCollection makes this process simple and painless.

KEEP TABS ON YOUR INVENTORY ITEMS.

Quickly search items and retrieve item details such as inventory levels, availability, allocations, restrictions, and much more with a simple but intuitive inventory lookup screen.

CONDUCT BIN AND SITE TRANSFERS.

Transfer merchandise to different bins within your site, or to different locations in your company, with just a few taps. Never lose track of your inventory again.

GET MORE WITH THE EXTENDED WAREHOUSE MODULE.

Turn on additional features like bin replenishment suggestions, safety stock and reserve inventory, and prioritized item allocation by customer.

MANAGE ITEMS' SERIAL AND LOT ATTRIBUTES.

See and edit manufactured-on dates, expiration dates, and other characteristics for all of your serial- or lot-tracked inventory items in your system.

PICK AND PACK SALES ORDERS WITH EASE.

DataCollection simplifies order fulfillment, picking, and packing, ensuring that you are able to ship your products quickly and accurately every time.

Warehouse management with efficiency.

WHY DATACOLLECTION?

DataCollection brings it all together. DataCollection is a barcode data collection application, available for both Windows Mobile and iOS. When paired with the functionality of Microsoft Dynamics GP, and, optionally, SalesPad Desktop, DataCollection allows users to receive purchase orders while generating the subsequent receipt in Dynamics GP, automatically print various paperwork (such as pick tickets, item/bin labels, and putaway reports), forward an order using customized workflows, and more, all in one application.

DataCollection gives you the power to do more. With DataCollection operating on a device equipped with a scanner, users can scan receipts for a product, locate inventory, and scan products for bin transfers, or as they are fulfilled to orders. Beyond all that, users can do inventory adjustments and stock counts, return items to inventory, enter reason codes, confirm merchandise quantities to be shipped, and much more, making mobile warehouse management infinitely easier and virtually foolproof.

KEY FEATURES

MOBILE

- Order picking and packing
- Purchase order receiving
- Site and bin transfers
- Inventory adjustments and lookup
- Stock count entry
- Shipping confirmation
- Purchase order receiving
- Returns processing

EXTENDED WAREHOUSE
