# SALESPAD™ DESKTOP + PayFabric

Unified, secure payment processing.

🌐 sales@salespad.com   📞 616-245-1221

## BUILT DIRECTLY INTO YOUR ERP SYSTEM.

No need to switch to a different software to accept payment from a customer, or dedicate resources to maintaining a separate payments solution.

BE SECURE WITH COMPLETE PCI COMPLIANCE.

Minimize your risk and liability by removing sensitive payment information from your company's computer systems. Prevent unauthorized access to data through encryption and tokenization.

ACCEPT PAYMENTS ANYWHERE.

PayFabric integrates with both SalesPad Desktop and Mobile, so no matter where you are, you always have access to your secure credit card processing system.

KEEP UP TO DATE WITH EMV SUPPORT.

Reassure your customers, and yourself, that you're on the cutting edge of secure credit card transactions by offering EMV processing through the supported PAX S300 and D12 devices.

SECURE YOUR DATA IN THE CLOUD.

Reduce liabilities by moving the point of entry, storage, and transmission of credit card information and other sensitive data to a secured cloud environment.

STAY ORGANIZED WITH CUSTOMER WALLETS.

Never enter the same credit card information twice — plus, store multiple customer credit cards in one location using SalesPad's Customer Wallets feature.

USE MULTIPLE PAYMENT GATEWAYS.

Enjoy the freedom that comes with multiple available payment gateways. Use a non-expiring, universal token to connect, and eliminate the need for different certifications.

REDUCE FEES WITH LEVEL 3 PROCESSING.

Reduce your card processing fees and save money when qualifying for Level 3 processing. Decreased rates and DSO (Days Sales Outstanding) mean lower costs for you.

Flexible and secure payment processing.

CONFIDENTLY ACCEPT SECURE CREDIT CARD PAYMENTS.

PayFabric is a cloud-based payment acceptance platform and storage hub created and maintained by SalesPad partner Nodus Technologies, Inc. PayFabric is easily integrated with SalesPad Desktop and SalesPad Mobile. Designed with an innovative and secure storage algorithm and validated with Payment Card Industry Data Security Standards (PCI-DSS), PayFabric alleviates many major challenges of PCI compliance by strong transaction data in the cloud and away from local environments.

PayFabric acts as the link between payments, gateways, and your SalesPad business. It's not a separate way to accept payments — it's the tool that allows you to stay within SalesPad when it's time to run a credit card transaction.

More information about PayFabric and Nodus Technologies can be found at www.payfabric.com.

WHY CREDIT CARD PROCESSING THROUGH PAYFABRIC?

PayFabric goes hand-in-hand with SalesPad. No need to learn a whole new software. PayFabric's interface is built right into SalesPad, and virtual customer wallets make accessing customer credit cards simple and quick. With a thorough and detailed audit trail, any discrepancies or problems will be immediately detected and easily resolved. Beyond that, PayFabric's list of supported U.S. and international payment gateways is always growing, ensuring that you will be able to accept payments from your customers, no matter where they are.

Cloud storage means less worry for everyone. By storing critical payment information in the cloud and utilizing an AWS hosted checkout system, PayFabric provides a safe, secure way of processing payments and eliminates the complexities associated with annual PA-DSS compliance audits. PayFabric provides daily reports of all activity on your account, including transaction summaries and account usage data.

HOW IT WORKS

Not sure if you understand how the exchange of credit card information works or where data is stored? Check out the handy diagram below:
